ABOUT ME

I am Ahmed Al Sulaimani, a Saudi architect and urban planner with a passion for Arabic calligraphy. With over five years of experience in architecture, I bring an eye for detail, precision, and design to my calligraphy work, ensuring that each piece I create is not only artistically beautiful but also meaningful.

In 2020, I founded AlefSeen, my own Arabic calligraphy art company, where I combine my architectural mindset with the timeless tradition of Arabic script. Throughout my career, I have had the privilege of working with diverse clients across the MENA region, creating bespoke calligraphy pieces for both private and commercial projects. Whether it's for personal commissions, corporate branding, or public art installations, I strive to push the boundaries of Arabic calligraphy, merging the classical with the contemporary to tell powerful visual stories. Every stroke and curve of the Arabic script is an expression of my passion for the art form, and I am committed to preserving its legacy while infusing it with modern innovation. Welcome to my portfolio - a collection of my journey through the world of Arabic calligraphy.
